Emergency Overview:

Thermoplastic is in general a non-hazardous polymeric material and does not present any serious hazards during its normal handling and use. As with any material; however, there are guidelines that should be followed in an emergency situation. If dust or vapors are inhaled, move to a well ventilated area. If skin or eyes are irritated, flush with water for 15 minutes.

Potential Health Effects:

Primary Entry Routes: Inhalation, skin/eyes, ingestion (vapors if burned or dust from machining the sheet)

Target Organs: Respiratory system, eyes.

ACOUSTICAL SYSTEMS - LLC

Acute Effects:

Inhalation: Prolonged inhalation of dust may cause nose, throat and upper respiratory tract irritation. Excessive heating may lead to decomposition with the release of hydrogen chloride that could cause irritation to upper respiratory tract.

Eye: Excessive heating may lead to decomposition with the release of hydrogen chloride that could cause irritation of eyes.

Skin: Dust from cutting and machining the sheet may be irritating to skin.

Ingestion: Not a likely route of exposure

Carcinogenicity: IARC, NTP, and OSHA do not list TPS sheet as a carcinogen.

Medical Conditions Aggravated by Long-Term Exposure: Not known

Chronic Effects: Not known

Inhalation: If irritation occurs from dust or vapors due to excessive heating, move to a well-ventilated area; if irritation persists, consult a physician.

Eye Contact: If irritation occurs from dust or vapors due to excessive heating, flush eyes with large amounts of water for at least 15 minutes; if irritation persists, consult a physician.

Skin Contact: If irritation occurs from dust or vapors from excessive heating, flush skin with large amounts of water for at least 15 minutes; if irritation persists, consult a physician.

Ingestion: Not a likely route of exposure
