

Waveform® Monoradial W

Waveform® Gaussian W

Waveform® Spline W

PRODUCT OVERVIEW

The **Waveform® Wood Family** of diffusive products are designed to enhance musical clarity and intimacy in performance spaces. The panels have an attractive wood veneer, curved or bell shaped appearance and are available in a high recycled content, ULEF, Class A fire-rated, and FSC certified MDF core which limits the amount of sound energy removed by absorption. When absorptive material is placed into the rear cavity of the units in an overhead canopy configuration, significant reverberation time reduction in the space can also be accomplished. The panels can also be arrayed to reduce periodicity effects and be installed on walls or ceilings.

SIZING

Waveform® Monoradial W Panel

- Standard Panel: 4' W x 8' L x 12" D
- Each panel weighs approx. 3.50 lbs/ft²

Waveform® Gaussian W Panel

- Standard Panel: 4' W x 4' L x 6" (W6) or 12" (W12) D
- Each panel weighs approx. 3.00 lbs/ft²

Waveform® Spline W Panel

- Standard Panel: 4' W x 8' L x 10" D
- Each panel weighs approx. 5.00 lbs/ft²

CORE FIRE RATING

Class A (per ASTM E-84)

FINISH

The **Waveform® Wood Family** is available in various finishes, including natural and engineered wood veneers and laminates. RPG offers clear lacquer or factory color matching of wood finishes and paint colors.

INSTALLATION

Overhead mounting of the **Waveform® Wood Family** is achieved by suspending units from integrated hairpin loops using RPG-supplied engineered cables and hardware. Each panel can be hung as a "cloud" or screwed together to create a canopy. Units can also be mounted directly onto walls using RPG-provided integrated cleats.

Note: See individual Omnifusor data sheets for additional information.
