1. RPG Wood Products are manufactured to match the most commercially available and custom hard or soft woods.
2. Stocked product samples are typically manufactured using common wood species – no products are available at any one time in all the above species. Check with your local sales representative or contact RPG corporate.
3. These examples are being provided for the general differentiation of wood species and should not be used as an absolute measure of how finished products will appear. Natural wood varies in tone and grain.
