3150	0.06
4000	0.05
5000	0.04
NRC	0.10

PRODUCT OVERVIEW

The **Planarform® Reflector A Panel**, available in an aluminum skin with honeycomb core, is used in auditorium ceilings to bring early reflections to the audience, increasing intelligibility and enhancing musical clarity and intimacy. When absorptive material is placed into the rear cavity of the assembled unit in an overhead canopy configuration, significant reverberation time reduction in the space can also be accomplished.

SIZING

- Standard Panel: 4' W x 8' L x 3/4" T
- Material Thickness: 3/4"
- Each panel weighs approx. 2.00 lbs/ft²
Should the project require a higher unit mass, 1 and 2 lbs/sf MLV (mass loaded vinyl) backings are standard options.

FIRE RATING

Non-Combustible

FINISH

The **Planarform® Reflector A Panel** is available standard in a white powder-coated finish. Units can be painted in custom colors or veneered with natural wood or laminates

INSTALLATION

Overhead mounting of the **Planarform® Reflector A Panel** is achieved by suspending units from embedded eye-bolts using RPG-supplied engineered cables and hardware. Each panel is designed to hang freely as a separate “cloud” or tied together with a bracket along the long or short edge to create a canopy.
